# OUR HISTORY, INVESTMENT OPTIONS, MANAGING DIRECTORS

Popoff & Foote Ventures LLC was born with the vision of becoming a conglomerate of companies capable of spanning diverse sectors of the global economy, with a strategic focus on capital and investment management. Since its inception, the company has worked to establish itself as a leader in the financial arena, offering services ranging from private equity management to specialized financial advisory.

Today, Popoff & Foote Ventures LLC operates a robust capital management industry, offering individuals and businesses the opportunity to grow their capital under expert management and constant monitoring. This service ensures that clients' capital is not only well protected, but also optimized to generate long-term sustainable returns.

## Financial Advisory Services

In addition to capital management, the company provides a comprehensive financial advisory service. This service allows individuals and institutions to maintain full control of their operations, while receiving strategic advice on the most profitable decisions to make or how to improve those already implemented. Popoff & Foote Ventures LLC is committed to constantly accompany and monitor its clients, ensuring that the best possible results are achieved.

## Trust Capital Management

The company's most recent development is Asset Management with Trusts. This product combines the traditional benefits of asset management with additional advantages in terms of tax security and asset protection. As these are products that seek to protect the client against unforeseen events, they entail additional costs that should be taken into account before use. However, when managed effectively, they can offer clients excellent returns along with solid asset protection.

# SECTION 2: CAPITAL MANAGEMENT

# MANAGEMENT STRATEGIES, YIELDS, ASSET DIVERSIFICATION

Capital Management is the core product of Popoff & Foote Ventures LLC, focused on investing in the world's major stock exchanges, with a particular emphasis on the New York Stock Exchange.

Our strategic focus is on identifying and selecting companies with strong growth prospects and a solid financial situation, which allows us to invest in high quality stocks with significant potential.

Diversification is a key element in our investment strategies, allowing our clients access to the best companies in the world.

At Popoff & Foote, we concentrate most of our investments in the United States because of its robust growth capacity and track record of delivering strong returns.

By diversifying appropriately, we seek not only to protect capital, but also to maximize return on investment across multiple sectors and regions.

The main objective of our capital management is to offer above-market returns while maintaining lower risk by carefully selecting companies of excellent quality.

For our services, we target a minimum annual return of 20%, thus ensuring that our clients' capital is not only well protected, but also positioned to generate substantial profits.

## FEE FOR SERVICE STRUCTURE:

One of the distinguishing features of our asset management service, as compared to other fund managers, is our performance-based fee structure. Popoff & Foote only charges its fees on the profits generated at the end of the investment period.

We have implemented a fee management rule that ensures that the client earns at least 5% net profit after our fees. Our goal is always to generate a return of more than 20% per year on the client's operations.

If the client experiences a Net Loss at the end of the year, the company will not be able to charge commissions. These rules are designed to align our interests with those of our clients, ensuring that we always seek to generate profits without harming the client in the process.

The text "SECTION 3: FINANCIAL ADVISORY SERVICES" is centered in a white box. There are decorative white wavy lines in the top-left and bottom-right corners.

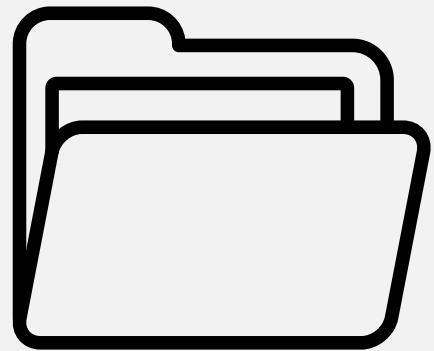

# SECTION 3: FINANCIAL ADVISORY SERVICES

# ADVISORY, ASSET PROTECTION, AND VALUE CREATION PROCESSES

## Introduction to Financial Advisory:

Popoff & Foote Ventures LLC Financial Advisory focuses on investments in the major stock exchanges of the world, but with the particularity that the client maintains full control over his investment portfolio. Our service is designed for those investors who wish to actively participate in the management of their investments, while receiving the support of a complete and constant advice.

## Financial Advisory Processes:

Popoff & Foote provides strategic guidance and ongoing monitoring to optimize the decisions the client wishes to make. We work closely with our clients to review and improve previously made decisions, and to develop customized financial planning that takes full advantage of stock market opportunities. This approach not only strengthens the client's decision making, but also allows them to learn and master basic market operations.

## Asset Protection Over Risks:

We understand the various risks associated with this product, which is why we are committed to providing comprehensive support for all client transactions. Our strategies are carefully tailored to the specific needs of each client, ensuring adequate risk management and solid wealth protection, while maximizing the potential return on growth.

# FREEDOM OF INVESTMENT AND INTELLIGENT EXPANSION

Because this service involves less operational intervention on the part of the company, we offer a lower fee structure at the end of the advisory period. This model not only incentivizes an efficient approach, but also ensures that Popoff & Foote's interests are aligned with those of the client.

Popoff & Foote Financial Advisory is an ideal option for those who wish to learn about capital management and take an active role in their investments. With the constant support of our team, clients will not only be able to achieve their financial goals, but also gain an in-depth understanding of the securities markets.

The text "SECTION 4: CAPITAL MANAGEMENT TRUSTS" is centered in a white serif font within a white rectangular border. Decorative white wavy lines are present in the top-left and bottom-right corners.

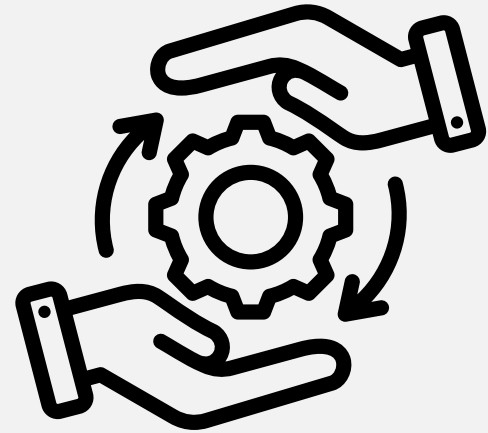

# SECTION 4: CAPITAL MANAGEMENT TRUSTS

# FIDUCIARY SERVICES, WEALTH PROTECTION BENEFITS, AND KEY PROCEDURES

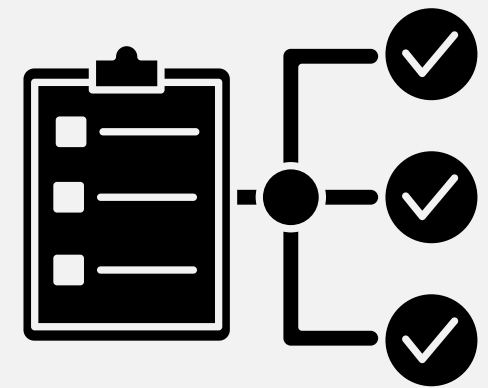

## Trust Capital Management

At Popoff & Foote Ventures LLC, our Trust Management service is designed to provide a solid and secure investment structure tailored to each client's particular needs.

## Investment Strategies

The funds under trust are invested primarily in the world's major stock exchanges, with a particular focus on the New York Stock Exchange. We use the same analytical rigor as in our direct equity management, selecting high quality assets with solid growth potential.

## Fiscal Optimization

The key advantage of this structure is that the profits generated by the trust can take advantage of favorable tax treatments, depending on the jurisdiction in which the trust is located. This tax optimization not only maximizes the net return, but also protects the client's assets from excessive taxation.

# ASSET PROTECTION AND LEGAL BENEFITS

One of the main reasons why clients opt for trusts is the legal protection they offer. Assets held in trust are protected against third party claims, including legal disputes and debtors.

This level of protection is essential for clients seeking to preserve their wealth over the long term and ensure the continuity of their investments in a safe and secure environment.

In addition, trusts are an effective tool to protect assets in situations of divorce and family legal problems, ensuring that assets remain out of the reach of marital agreements or family disputes.

This means that in the event of litigation, financial problems or family conflicts, the trust assets remain safeguarded and beyond the reach of direct legal action.

## Strategic Alliances

We collaborate with Investor Trust, one of the largest and most recognized fiduciary management firms in the world.

Through this collaboration, we efficiently and strategically manage assets placed in trust, providing a comprehensive approach that combines security, performance and tax optimization.

## **GLOBAL DIVERSIFICATION AND GEOGRAPHIC FLEXIBILITY**

At Popoff & Foote, we understand the importance of diversification not only in assets, but also in jurisdictions. Therefore, our trusts are strategically located in multiple regions around the world, allowing our clients to benefit from the specific advantages offered by different legal and regulatory frameworks.

This provides additional flexibility, allowing for adjustments in the trust structure according to changing client needs or market conditions.

# KEY PROCEDURES AND ONGOING ACCOMPANIMENT

We work hand in hand with our clients to define the terms of the trust and develop a management plan that fits their financial and equity objectives.

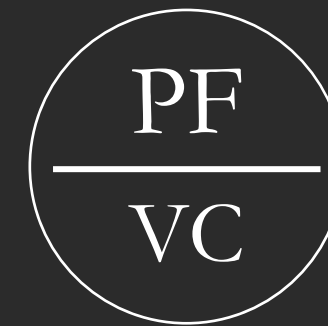

Our team not only manages the trust, but also provides ongoing support, ensuring that all decisions are informed and aligned with the client's goals. In addition, our procedures are designed to be clear and transparent, allowing the client to maintain full control and understanding of how their assets are managed.

In summary, Trust Management at Popoff & Foote not only provides a secure avenue for investment and wealth protection, but also ensures that assets are well positioned to grow and prosper under expert management and a favorable legal environment.
